T H E 1 1 , M A C H

EMPLOYMENT CREATION (JUSE) PROGRAM, BUTERERE COMMUNITY DEVELOPMENT CENTRE, ASASS-BURUNDI www.healthwelfarework.org and www.terimbere.net

Dear Neighbours,

On behalf of ASASS-Burundi and the Community, I am glad to inform you that local team has approved an innovative idea for the mobilisation of the recently graduated and the undergraduate students in Burundi who have problems of lacking opportunities to improve their skills due to their poor economic and social live hood.

My innovative scheme is to be involved in applying technologies, the latest networking mobile phone applications and computer technologies, visit schools, churches, and communities introducing opportunity that TERIMBERE can result generation in Burundi, to vulnerable and targeted group in rural communities when they interact with PH.D professionals to share information.

ITC and Internet for development

Therefore the program is called Jean-Claude KAMWENUBUSA University Student. I will use my status of student at a university to call other students to join and learn. **JEANCKA** means Jean-Claude KAMWENUBUSA.

I have set an agenda for this campaign scheduled from March-May 2010.

Please, if you see any way to help us to achieve this goal before May, help.

The goal will be achieved if we attracted 25-50 under-graduated young in Burundi.

Together with other students like me, we can promote technologies; join TERIMBERE web site and lean business skills, social sciences and business management and share experience.

If you know a young student in Burundi, an organisation which has students who are passion by Technologies and Communication, tell them. This will impact PH.D professors to join the campus and help these students who want to learn.

JUSE purpose it to find young people and dream way to create youth employment in Burundi and promote Technologies, Medias and internet for economic development.

Jean-Claude's goal is to attract 25 to 50 undergraduate youth in Burundi and unemployed recently graduated.

Join and help toward the achievement of this goal, invite your friends in Burundi.

Problem to be addressed:

Generation ccollege and university students in Burundi and as well in Africa have low retention rates and low academic advancement rates. Under gradated youth stop their university studies due to the lack of input, their parents cannot afford to pay tuition fees because they are poor. Others are orphans, HIV/AIDS vulnerable. Undergraduate youth in Burundi need opportunities, such as service-learning and research to improve retention and academic advancement rates and to gain civic skills, experiences and an ethic of service and civic responsibility.

JEANCKA UNIVERSITY STUDENT STRATEGIES TO ADDRESS THE PRIMARY NEEDS

JUSE aims to improve high school graduation rates among people in Africa by integrating disadvantaged youth in employment creation, thereby decreasing unemployment and promoting business communication strategies via JETIMETV.

ICT and internet to improve livelihood and entrepreneurship skills in developing country.

DID YOU KNOW ?

"An Africa without a sustainable, strong knowledge sector of its own will always remain in a dangerously dependent position"

What are you waiting for?

WELCOME HOME AT SCHOOL

TECHNOLOGIES AND SERVICE TEACHING-LEARNING has been shown to have positive impacts on retention and academic advancement. In 2008 ASASS-BURUNDI has developed partnership with Europeans Organisation, IWITH.ORG. Since then, ASASS-BURUNDI Technologies and Information Communication (ICT) are grated by IWITH.ORG FOUNDATION. We need to promote ICT and Internet in education, research and transferring knowledge and improving skills of vulnerable youth in Africa and by starting in Burundi.

We do this through training youth to produce videos and language media that inform and entertain. JETIMETV provides the means and promotes the opportunity for area citizens to exercise free speech through media production and distribution of DVDs for television and CDs for radio broadcasting news. The course focuses on

- History and doctrines of JETIME Foundation
- Internet Governance and web designing
- JETIMETV communication strategy, Multimedia, Arts and Entertainment
- Faith and leadership development

Course categories:

1. PSYCHOLOGY (counselling) in Medical sciences faculty
2. IT & COMPUTING (Introduction internet governance and web site designing)
3. ENTERPRENEURSHIP SKILLS (Introduction to business management)

Course duration: is 3 weeks.

Certificate: The course does not award a certificate.

The courses: are "TUTORED" by PH.D Doctors professors.

Class location: Internet "online campus"

Date: 5th May, 2010 to 31 May

Course result to student: Students will be asked to draft a project

Course attended in BCDC: Improved capacity of students. Number of students who are doing internship in COUNCELLING CENTRE OF BCDC. The projects of students will be reviewed so that we will see on what they are interested to do, so that we involve them in ASASS-BURUNDI programs (such as BCDC centre in Buterere within children education...).

FACULTIES

At this stage, JUSE program concerns only under graduated young people and recently graduated students over the age 16-30 from various universities of Burundi who are interested in pursuing a career in SOCIAL AND ECONOMIC SCIENCES in three faculties:

A.Fac1: Management and Administration sciences.

B.Fac2: IT and Computer sciences

C.Fac3: Telecommunication sciences

D.Fac4: Medical / Public Health Sciences

Active students who will complete assignments, exercises provided by PH.D Profs:

-Will do an internship in Buterere Community Development Centre (BCDC)

-Will do be award a certificate by TERIMBERE

-Will be integrated in TERIMBERE education programs

TERIMBERE, JECTV Communication strategy, the Mars 2010

Students are trained do an internship working in ORPHANAGES AND DEVELOPMENT CENTRES.

The programme cares for learners aged 6-30 who are introduced to a variety of program. This is a social based programme where the young child discovers a new world and new friends while playing. There are many BUSINESS Schools around the world , but most are extremely difficult to get into.

There are many BUSINESS schools around the world, but most are extremely difficult to get into. They're expensive and potential students have to pass many tests in order to be admitted to the schools.

That's exactly what makes JEANCKA UNIVERSITY STUDENT program unique - none of the students pay tuition and none of them have to have any special skills before they join the school. What these young people need to learn to have are commitment, dedication and a strong sense of teamwork. In its multi-faceted contribution to the community, JEANCKA UNIVERSITY STUDENTS run a variety of programmes, all free of charge for young people.

These amazing young people from seven to twenty-five years old are offered experiences in story telling, acting, singing, painting, drawing, poem citation, digital photo and video capturing, dancing and singing. The children and are offered the works!

COMMUNICATION STRATEGIES: Truth of who we are.

JECTV is a digital communication strategies group that use video cameras and digital photograph technologies to take pictures of the population and places. The group focus on youth expression programs, global awareness, consciousness on peace, Human Rights , education , development and support MDGs. The film and music are strategies freedom of expression through humanitarian and social Medias.

JECTV focus on production of audiovisual DVDs and CDs to be broadcast by local channel TV, Radio and web internet .

- 1. **Listen** to the national Radio stories of experts on environment, agriculture, on child and healthcare, on arts and culture, sport, on development and on behavior change.
- 2. **Watch** documentary films and video series on national channel television including live concerts, ministries, churches, the arts, entertainment and sport by talented youth.

TRUTH OF WHO WE ARE

The purpose of this flyer is to give you an image of the truth of who we are so anyone can find out a sustainable way of cooperating with us.

What is the real meaning of one's life and place? Is one sad, happy, withdrawn, hopeful or indifferent?

JECTV digital communication strategy continuously seeks to help find answers to such questions via interviews.

Journaliste at National Radio during Workshops on nutrition 2007.

INTERNESHIP- We encourage youth to learn and apply acquired knowledge to the development of practical skills.

JUSE member, BIZIMANA Jean-Marie , during interneship in a student in studio 2009

JUSE, youth ideas:

I like JUSE program because it brings together under-graduated young in developing countries and PH.D professors to maximize the use of ICT tools by connecting to the Internet, improve skills and knowledge and share experiences, by Annociatte NIYINGARUKIYE student at the Technical school ETS Kamenge.

who are you?, an under graduated young? architectural student?, what kind of things do you want to learn in school? Communication? Cartoons?, graphic designing, music, film making? Singing ? Web designing ?, Sounds pretty strange, according to Burundi youngsters,

there's nothing more exciting than doing just that with JEANCKA UNIVERSITY STUDENT TO CREATE EMPLOYMENT IN DEVELOPING COUNTRIES
